

The new journey of  
teaching & learning

EXPLORE • INNATE • INNOVATE

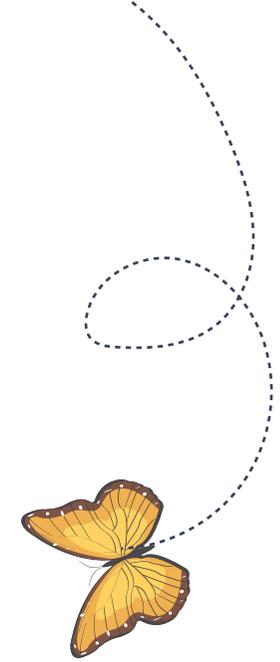

Education is perhaps society's most critical responsibility. Educational institutions impart knowledge the students, lay emphasis on their physical well being and prepare them for social challenges. But unfortunately, institutions and teachers are not yet fully equipped to understand the mental health issues of students.

# Ever noticed a child facing difficulty in learning at school?

Kids do not learn the same way. For some, grasping what is being taught in class is difficult. Here is why this happens:

They have different learning styles!

**VISUAL**

"I see what you mean."

**AUDITORY**

"I hear what you're saying."

**KINESTHETIC**

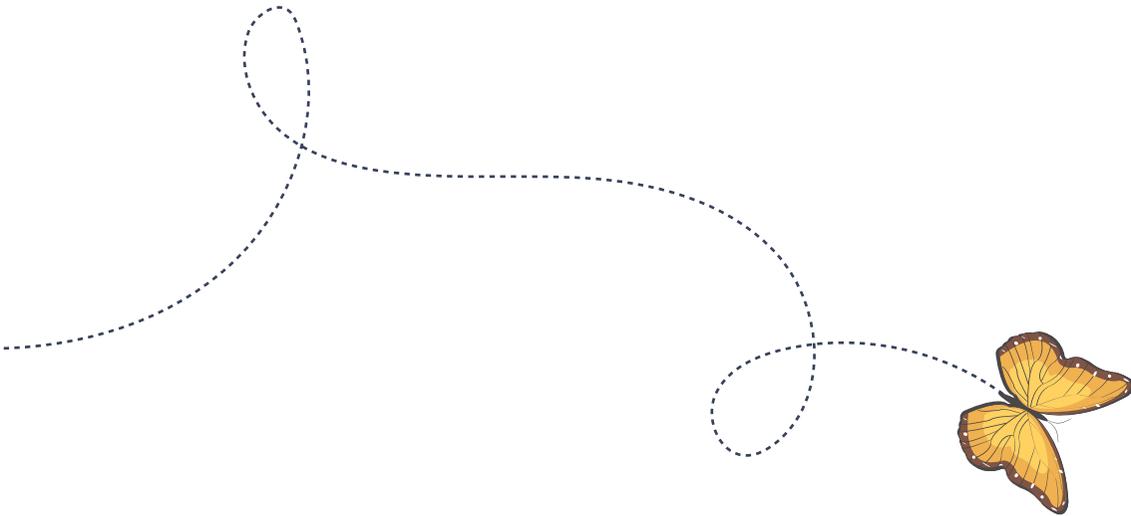

"It feels to me like..."

## But, how do we know about our child?

If you want to know about your child, you are at the right place...  
At Brain Spark, we take fingerprints through which brain mapping is done

The Process is called DMIT:

**Dermatoglyphics Multiple Intelligence Test**

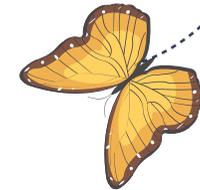

# What is DMIT?

It studies the unique developmental potential within an individual, by studying the ridges and undulations on his/her palms, toes and skin. Unlike most generic means of talent testing and assessment, like E.Q and I.Q tests, Dermatoglyphics assigns an exclusive, unique identity and result to every individual user based on the unique mapping of genetic information.

## Benefits of DMIT?

- Gives clear picture of multiple intelligence and learning styles of your child to help you understand strength and weaknesses of your child.
- Offers specific suggestions for improvement and tips for parents suggesting number of activities to groom your child.
- Can develop multiple intelligence of your child on your own and save your time and money to be spent on type of education and parenting aid which are actually not required.
- Better understanding and acceptance of strength and weaknesses of child helps strengthen relationship amongst Parents and child.
- Reduces emotional and behavioral clashes in adolescence years.
- If worked as per suggestive tips one can turn weaknesses in to strength and excel in preferred career path.

## What does DMIT

reveal about the child?

### 01 Affective Learner

- Self-discovery through modifications and leveraging on existing materials i.e. learning of new subjects/ topics is preferred to be example based.
- Leverage and learn from the media – newspaper, films, magazines etc.

### 02 Reflective Learner

- Open-minded, able to absorb a lot but not necessarily understanding all.
- Need patience with continuous repetition in the accumulation of knowledge.

### 03 Cognitive Learner

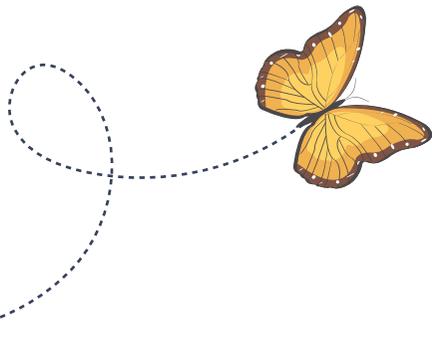

- Self-discovery in pursuit of knowledge i.e. will take own initiative to see knowledge and find answer.
- Need to be motivated with a reason to learn, with a clear goal; allow more thinking & give less answers.

### 04 Critical Learner

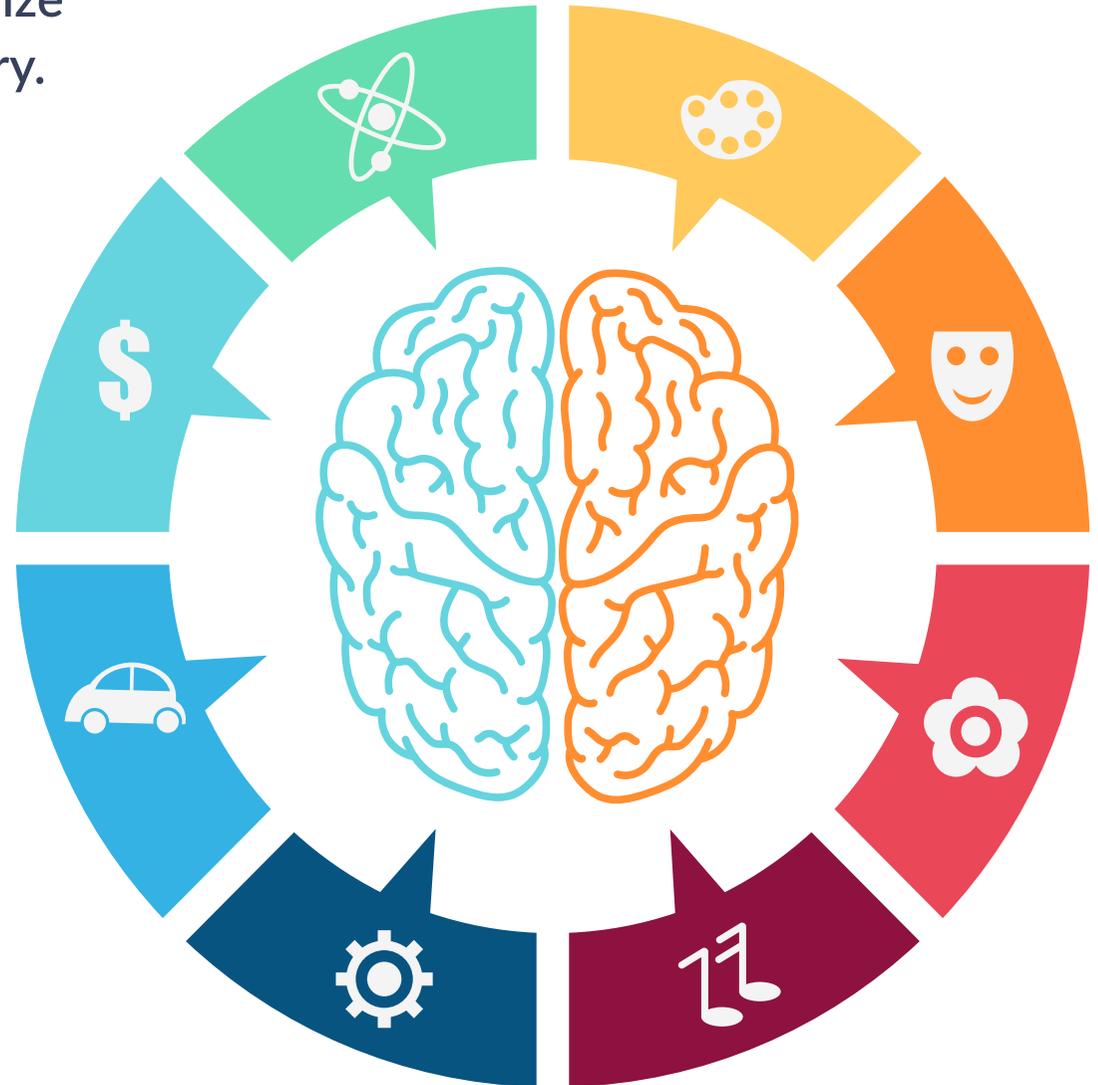

- Creative, love challenges, very competitive.
- Thrive on setting new standards and challenges.

# Brain Dominance

In 1981, Dr. Roger Sperry won Nobel Prize for his research on the Split-Brain Theory. The studies demonstrated that the Left and Right Hemispheres are specialized in different tasks. Our Left Brain is responsible for our analytical & logical side while the Right Brain is responsible for our artistic & creative side.

LEFT BRAIN    RIGHT BRAIN

## IQ (Intelligence Quotient)

Grasping The Essentials In A Given Situation & Responding.

## EQ (Emotional Quotient)

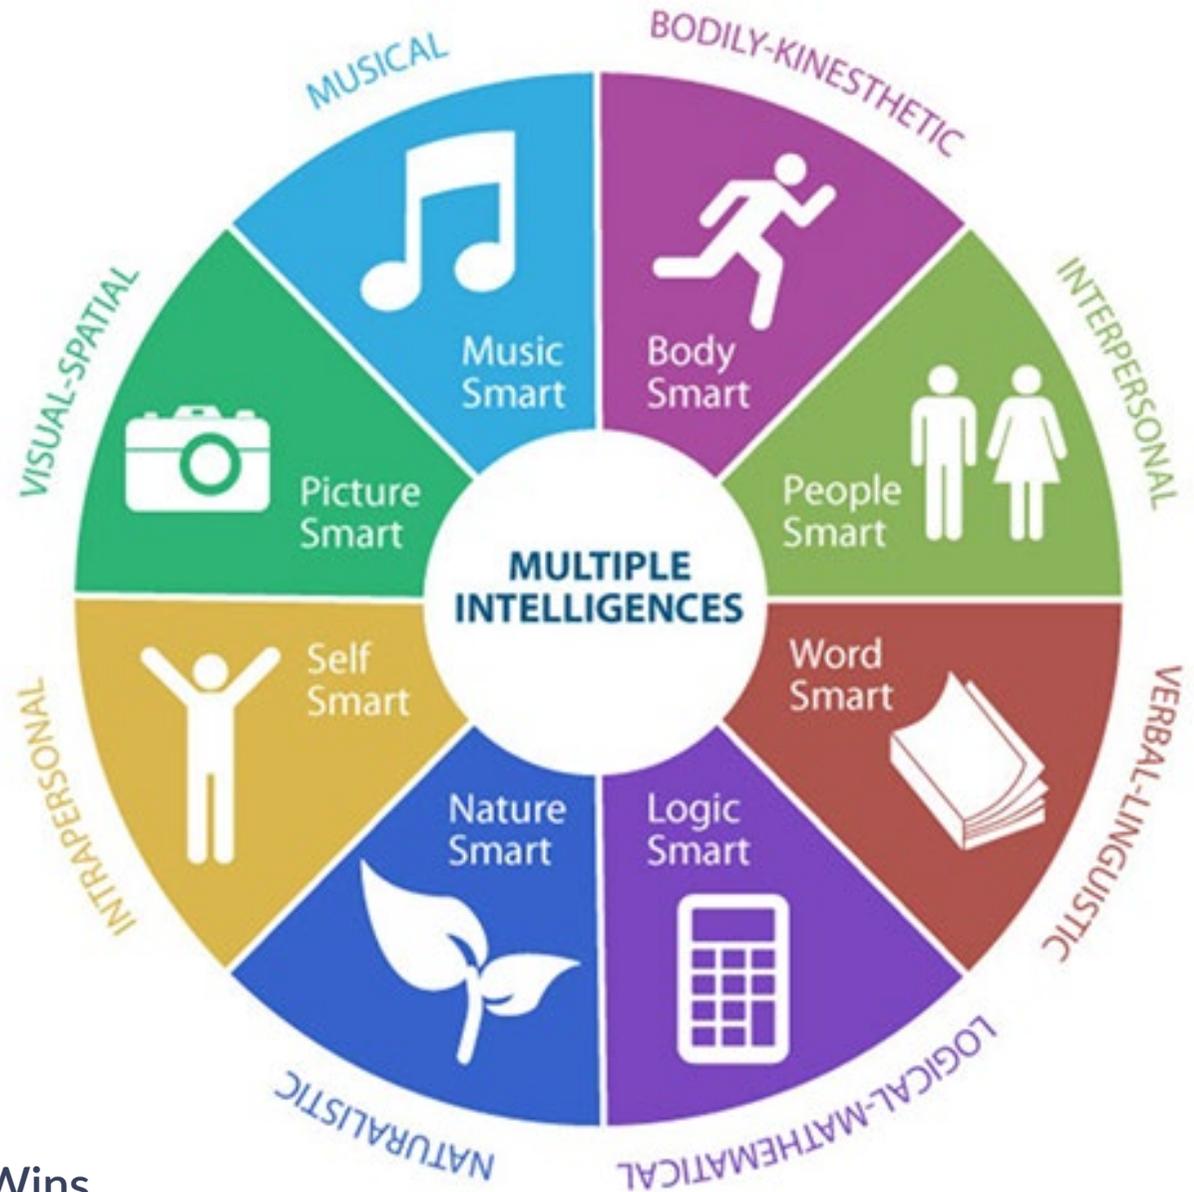

To Act & Communicate Appropriately.

## CQ (Creativity Quotient)

Original Thinking - Taking Planned Action - Producing Result.

## AQ (Adversity Quotient)

Who Gives Up And Who Fights Back & Wins.

## Isn't this insightful? We have a lot more to offer!

Get in touch with us for more information. We are here to help you!
