

The new era of growth,
recruitment & business

EXPLORE • INNATE • INNOVATE

All corporate firms engage employees for variety of tasks in their firms. It shall be of much help if the employers can know in advance the capacities and fields of perfection of the ones whom they are employing for specific posts. Here, DMI Analysis (DMIT) provides better source to find out right person for the right job! It can guide proper placements for various works and departments in a firm.

What is DMIT?

It studies the unique developmental potential within an individual, by studying the ridges and undulations on his/her palms, toes and skin. Unlike most generic means of talent testing and assessment, like E.Q and I.Q tests, Dermatoglyphics assigns an exclusive, unique identity and result to every individual user based on the unique mapping of genetic information.

Benefits of DMIT?

- Selection of right career path
- More effective human resources.
- Placing right person at the right place.
- Reduces cost, increases healthy competition and create better corporate value.
- Happy and dedicated employees give better performances.
- Deserving and preferred work encourages better and devoted performance.
- Reduces frequent inflow and outflow of employees.
- Consistency and stability in employees creates healthy bond in employer and employees and gives cost effective betterment in performances.
- Activities to encourage employees to improve their weaknesses helps better use of talents and strength of the person.
- Reduces cost and energy in trial and error in placement
